

How to Setup Email in Eudora

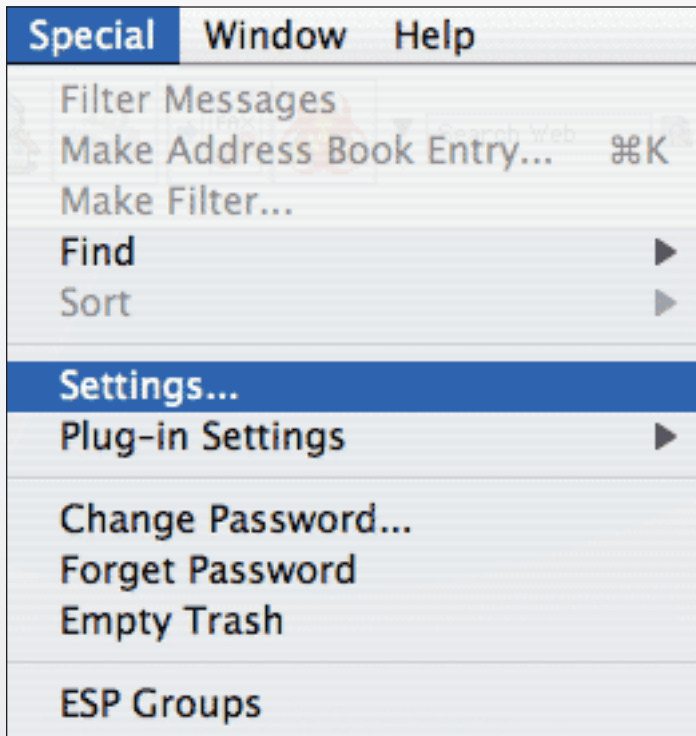

information for macrobatix customers

The following is a step-by-step tutorial showing you how setup email in Eudora. Brought to you by Macrobatix, LLC.

STEP 1

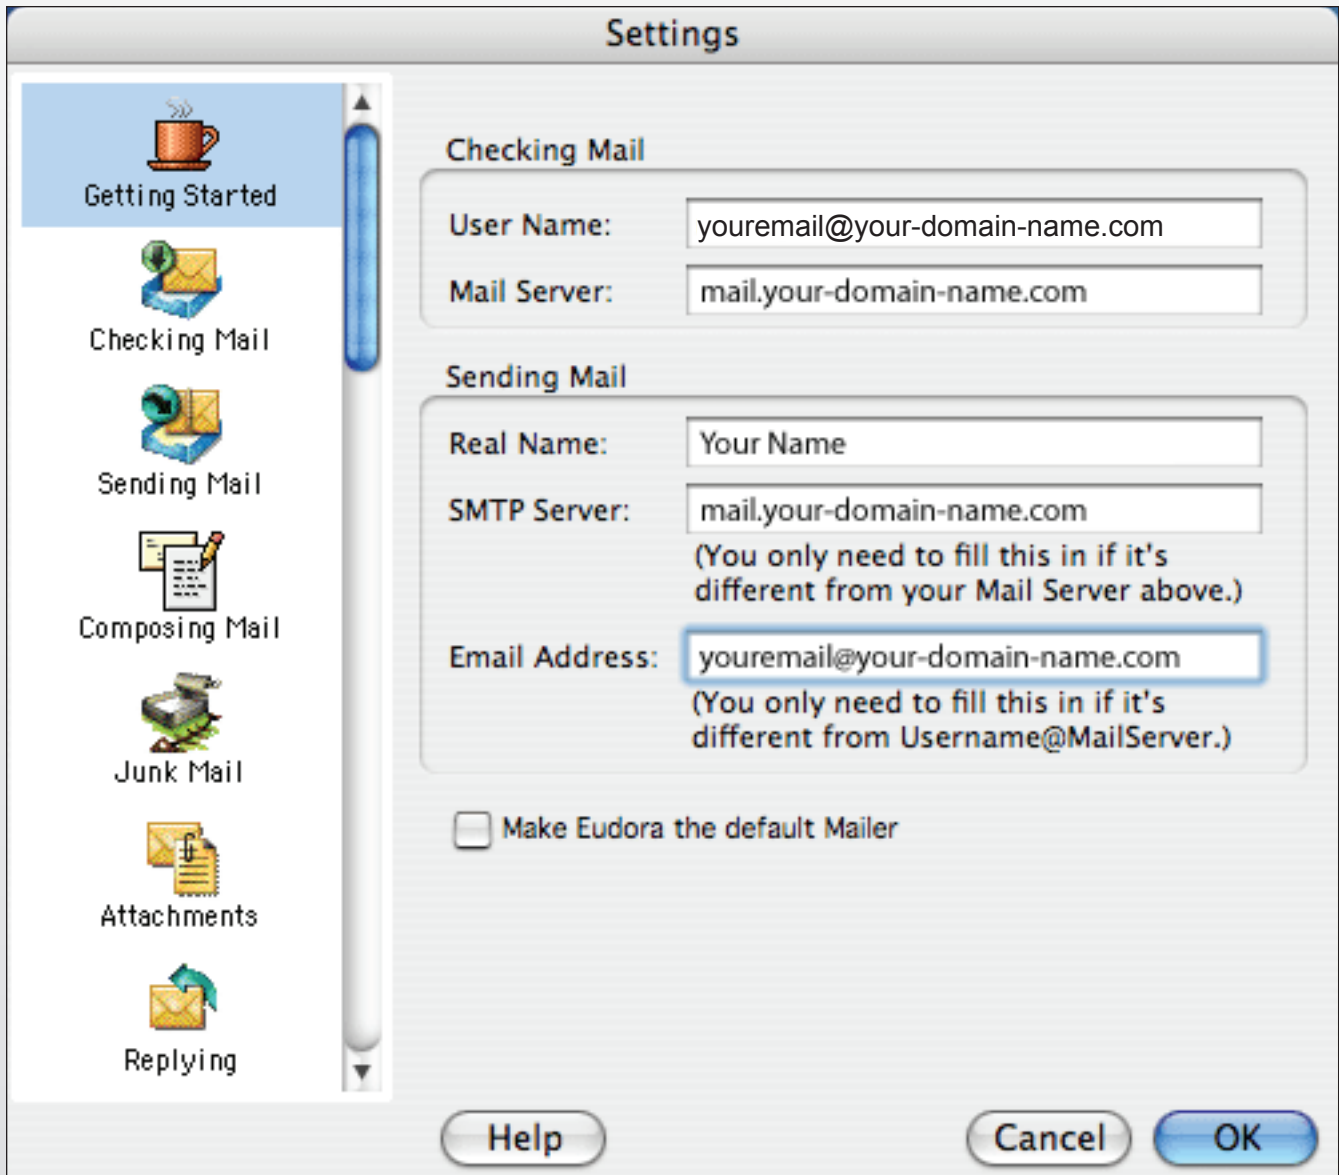

From the Eudora menu, select "Special", then "Settings".

STEP 2

In the "Settings" window, enter the following information in the appropriate fields:

- User Name: Enter your entire email address as your user name.
Example: youremail@your-domain-name.com.
- Mail Server: Enter your domain name for your incoming mail server.
- Real Name: Enter your first and last name or your nickname.
- SMTP Server: Enter your domain name for your outgoing mail server.
- Email Address: Enter your entire email address, again.

The screenshot shows the "Settings" window for Eudora. On the left is a vertical sidebar with icons and labels for various functions: "Getting Started" (cup of coffee), "Checking Mail" (envelope with magnifying glass), "Sending Mail" (envelope with arrow), "Composing Mail" (notepad and pencil), "Junk Mail" (trash can), "Attachments" (envelope with paper), and "Replying" (envelope with arrow). The main area is titled "Settings" and contains two sections: "Checking Mail" and "Sending Mail".

Checking Mail

User Name:

Mail Server:

Sending Mail

Real Name:

SMTP Server:
(You only need to fill this in if it's different from your Mail Server above.)

Email Address:
(You only need to fill this in if it's different from Username@MailServer.)

Make Eudora the default Mailer

Buttons: Help, Cancel, OK

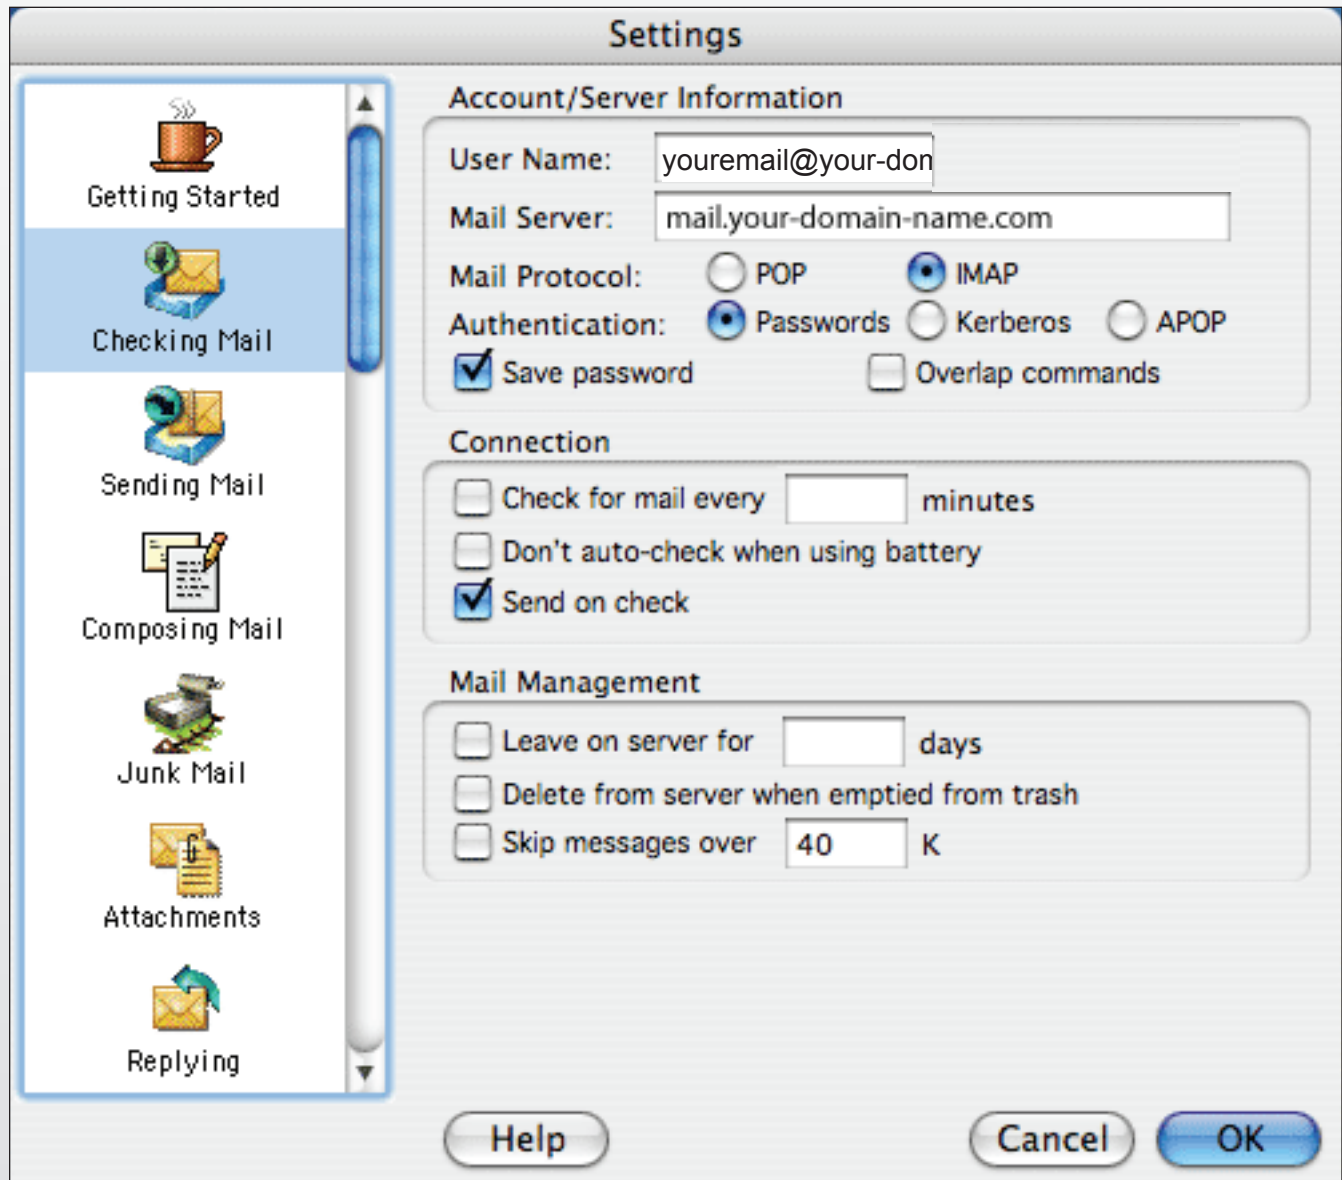

STEP 3

Click "OK".

STEP 4

In "Account/Server Information", enter the following information in the appropriate fields:

- User Name: Enter your entire email address
- Mail Server: Enter the domain name of your mail server.
- Mail Protocol: Select "IMAP".
- Authentication: Select "Passwords".

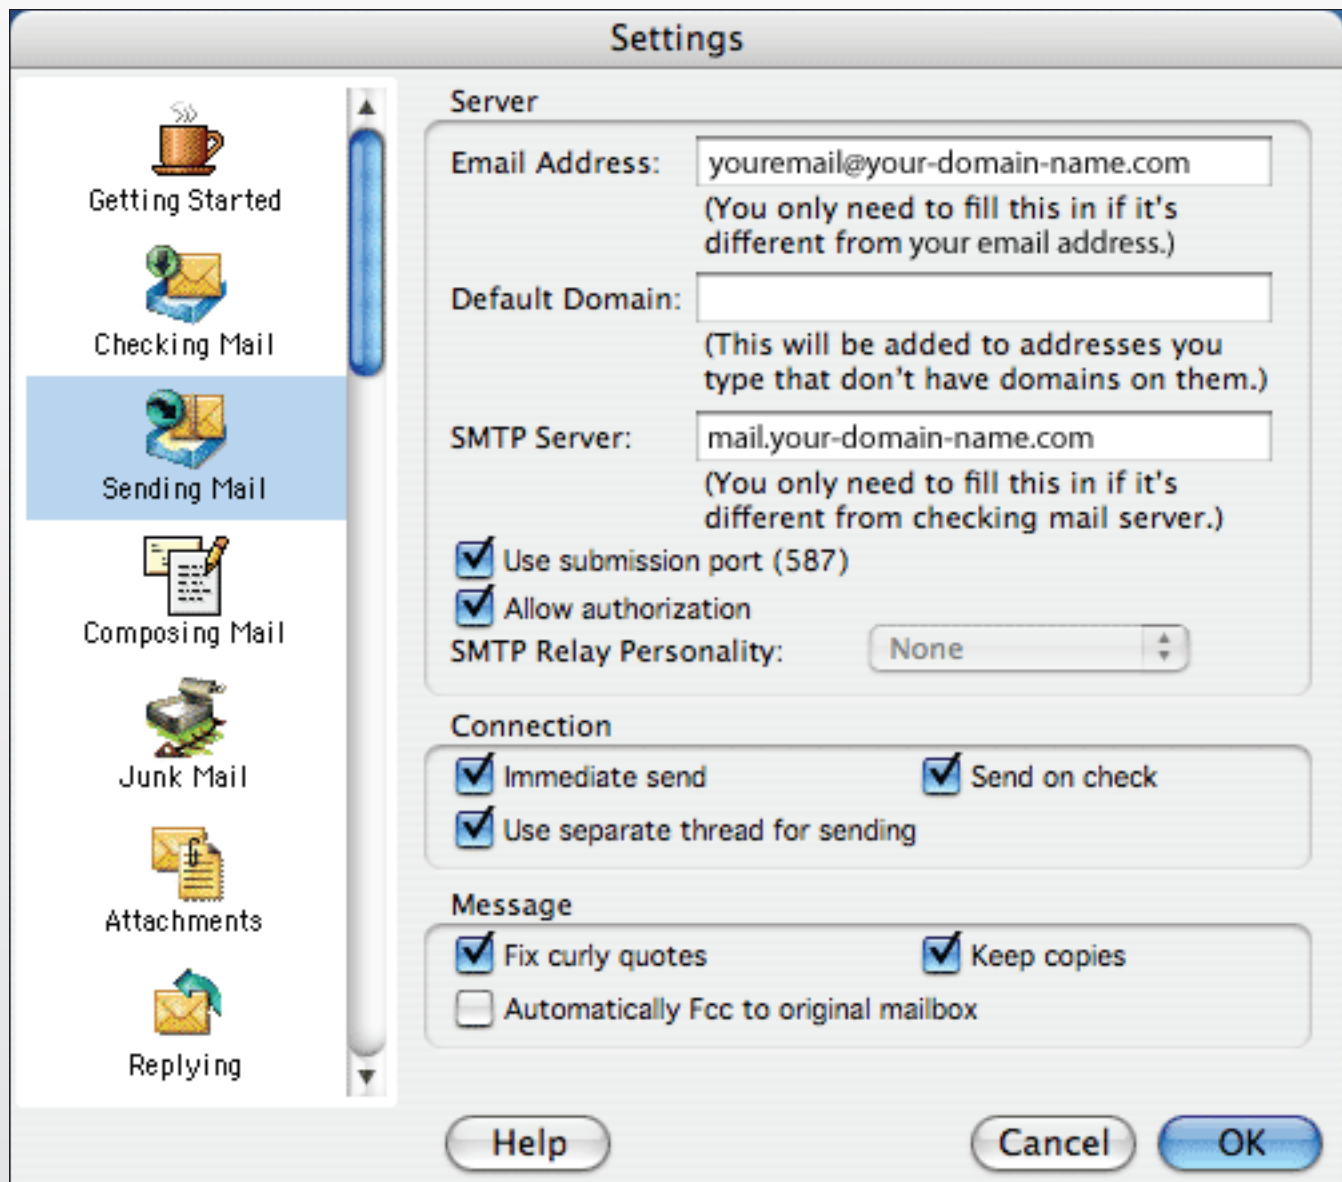

STEP 5

Click "OK".

STEP 6

Enter your entire email address and SMTP Server. Check the boxes "Use submission port (587)" and "Allow authorization". All other fields are optional.

STEP 7

Click "OK".

Setup Complete

Congratulations! You have successfully set up your email account in Eudora.
